

## RoHS Compliance — Jan 2014 Update (EU RoHS 2 Directive (2011/65/EU))

This summary provides the status of compliance with the RoHS Directive and associated activities for HydraForce.

### What are the RoHS Directives?

RoHS stands for the Restriction of Hazardous Substances. There are three specific European Union Directives that restrict the use of materials on specific products placed on its internal market listed below.

| Restricted hazardous substances |                            |   |
|---------------------------------|----------------------------|---|
| < 0.1% lead                     | < 0.1% mercury             | polybrominated biphenyls (PBB) < 0.1%         |
| < 0.01% cadmium                 | < 0.1% hexavalent chromium | polybrominated diphenyl ethers (PBDES) < 0.1% |

### HydraForce's Commitment

“HydraForce products meet RoHS environmental requirements restricting the use of cadmium, quick silver, lead hexavalent chrome, polybrominated biphenyl (PPB) or polybrominated diphenyl Ester (PPDE) in valve and manifold products, components and packing materials.

All HydraForce valve and manifold products meet requirements limiting the use of hazardous materials as identified in Directive No. 2002/95/EC, Directive No.2000/53/EC, Directive and 65/2011/EU and OSHA Standard 1910.1200(g).

Between now and 22 July 2019 , HydraForce will determine compliance to EU RoHS 2 Directive (2011/65/EU) requirements Electrical and electronic equipment which fell outside the scope of the original RoHS Directive by resourcing/ redesign/replacing the RoHS listed materials product supplied by HydraForce.

For all other products, please consult factory.

**For Questions regarding RoHS compliant HydraForce products or product availability, please contact your HydraForce representative, one of our authorized business partners, or e-mail us from our website at [www.hydraforce.com](http://www.hydraforce.com).**
