

## **Overview**

### **Description**

EC16-42 is a screw-in, cartridge style, priority on demand pressure compensator valve with static load sense. Intended to provide priority flow in required amount, while allowing excessive flow to be used for auxiliary functions.

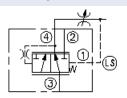

### **Operation**

With inlet flow at port 3, the EC16-42 will deliver required priority flow at port 4 regardless of load pressure. Excessive flow exits at port 2 and port 1 is the load sense port. All ports may be fully pressurized.

### **Features**

- · Priority-on-demand
- Static load sense
- · Hardened parts for long life.
- · Quiet, modulated response.
- Industry-common cavity.
